

# NOT ALL MDR SOLUTIONS ARE CREATED EQUAL.

Through our Managed Detection & Response platform, our analysts search your networks 24/7, hunting through logs to find suspicious activity. We won't waste your time with false notifications or annoying emails- we only alert you if there's a real breach that requires your attention, letting you focus on what's important to you and your team. We give you the key to your own data with our customizable reports on our SCOPE portal to allow you to zoom in on data points that are

important to you. Pondurance TH+R has the ability to replace—or work in conjunction with—your existing SIEM and MSSP contracts, while delivering a higher level of security at a more cost-effective price point.

Like how we stack up against the competition? Want to see our tech stack in action? Request a demo.
