Managed Detection and Response (MDR) for Endpoints

PONDURANCE

24/7 endpoint protection with complete visibility and rapid response

Pondurance MDR for Endpoints delivers a 24/7 detection and response solution with full management of some of the best endpoint security technology in the business. Powered by a dynamic technology platform and elite security operations centers (SOCs), we provide full visibility into your data and round-the-clock access to Pondurance experts for help with any issue, anytime.

THE PONDURANCE DIFFERENCE

24/7, U.S.-based SOCs

Skilled threat hunters

360-degree full visibility across networks, logs, endpoints, and cloud environments

Rapid response and close collaboration

Integration with your existing infrastructure and controls

Custom service packages designed for your desired business outcomes

BEST-OF-BREED TECHNOLOGY POWERED BY ELITE SECURITY EXPERTS

Pondurance partners with industry-leading endpoint security tools from SentinelOne, CrowdStrike, and Blackberry Cylance to offer fully managed licenses including implementation, policy management, remote isolation, and remediation. If you already use these products, there is no additional charge for licensing. Though we only offer full management of our partner solutions, Pondurance will never require you to rip and replace your preferred solution. We can ingest alerts from other EDR tools you may use to deliver comprehensive visibility and detection on your endpoints as your trusted partner.

The Pondurance SOC brings decades of experience and expertise to provide MDR endpoint services as an extension of your team. Our analysts monitor your endpoints 24/7 while performing continual threat hunts. When a true positive alert is validated, the SOC quickly performs preapproved isolation and remediation tactics within service legal agreements, or if you are not using a product that is fully managed by us, we send the alert to you with recommendations for remediation after speedy but rigorous analysis. And, of course, if you need any assistance or guidance, you can contact a Pondurance SOC analyst anytime day or night via the Scope platform.

KEY FEATURES

Pondurance delivers comprehensive SOC services that enable organizations to quickly adapt and defend the human experience in today's rapidly transforming digital world. With Pondurance MDR for Endpoints, you get:

- Fully managed licenses of the best endpoint security tools in the industry – SentinelOne, CrowdStrike, or Blackberry Cylance.
- Integration with other endpoint security tools – Never have to rip and replace your preferred solution.
- 24/7 threat hunting included with MDR services.

*"Since we were first introduced to the Pondurance team, they have been thorough and responsive professionals with creative solutions. It's comforting to know highly skilled SOC analysts monitor our network 24x7x365." — **Jason Inman,** Director of Tech Services, Elkhart Community Schools*
